

DNAnimal

Animal Species Testing Made Easy

DNAnimal kits for your lab

The DNAnimal product line enables you to identify and differentiate animal species in your sample DNA.

DNAnimal kits are available for most domestic animal species as well as for some specific applications like halal testing or animal species groups for feed testing.

Eurofins GeneScan is also the central production unit for kits and reagents for the labs of the Eurofins group – benefit from kits derived by the experience and quality of a market leader in molecular biological testing!

DNA Extraction

For DNA extraction, we offer a number of different kits for different matrices. Choose the optimal method for your sample matrix.

DNAnimal testing services

Vegetarian or vegan food, food for religious communities like halal food or just quality control of your meat-containing product: Animal species testing is important in many aspects and helps ensure your customer's satisfaction and product reputation.
